

Steven Watson

Foundation Degree
Systems Support Year 2

“When I left school I came to the college to study the BTEC National Diploma in IT. I visited other colleges but this one appealed more to me as the staff seemed very friendly. After successfully completing the course - a New Foundation Degree in ICT Systems Support was introduced. The course sounded interesting and challenging. I chose to continue my education at this particular college because I already knew the lecturers and the college is local to me. The lecturers are all friendly and very helpful when you need a hand. I would recommend this degree course to everyone who enjoys IT and wants to progress to a future career in computing.”
